"We're farmers too"

Now more than ever, farming in Australia has become highly dependent on machinery cost and reliability. This is why OzValue Ag is committed to bringing the farmers of Australia, well priced quality machinery.

With an ever expanding range, the team at OzValue Ag is continuing to introduce such equipment to Australia. OzValue Ag is able to source machinery from manufacturers around the world and sell direct to the farmer eliminating importers and distributors.

Put simply this all results in a lower price for the farmer.

Donder Spreaders

NEW
Stainless
Steel

As farming progresses, so do the Donder Fertilizer Spreaders.

Donder are able to bring a simple machine, with all the features and technology needed in today's conditions, at a fraction of the price of many competitors, without comprising safety or quality.

The CGSA series is not just about saving money, but applying fertilizers as evenly and precisely as they should be.

Adjustable spread width

With the ability to adjust spreading widths infinitely from 10-36 metres, the CGSA series is versatile enough to suit many types of farmers and different farming practices.

Disc and blade sets are all available in:

- 10 - 16 metre
- 18 - 24 metre
- 24 - 36 metre

Donder 4000 SS

With all the benefits you have come to expect from the Donder Spreaders such as reliability, ease of use, excellent spread pattern, good price and most of all excellent back up & service.

Great has just got better. Introducing the new Stainless Steel 4000L Donder Fertiliser Spreader. If you're a contractor or farmer that finds themselves putting out hundreds of tons of fertiliser each year, then this is a machine you will want to take notice of.

Over time the products that get put through these machines are highly corrosive and will deteriorate the painted surfaces. With the new Stainless Steel model, the machine will outlast the best of any painted machine on the market.

This machine boasts full stainless steel hopper panels, flow control gates and spinners, along with new LED tail lights. So all your main components will last for many years to come. Linkage brackets to fit most Cat III quick hitches.

*Note - Special orders can also be made if you require a stainless steel machine in our other hopper.

More Choice. Less Money.

More Features. Less Money.

Flow Regulator

The flow regulator allows fertilizer to flow evenly and consistently whether the hopper is full or nearly empty.

Sieve

A swing-away hinged sieve prevents oversized fertilizer and unwanted objects from entering the metering area of the spreader.

Rate Adjuster

The simplistic rate adjuster provides a consistent spread rate, without the hassles of electronics or complex moving parts.

Heavy Duty Gearbox

Maintenance free heavy duty oil bath gearboxes with stainless steel components, ensure machine longevity and a stress free operation.

Mud Guards

Plastic moulded mud guards prohibit mud and water from building up on spinners in wet conditions.

Tail Lights

There is no compromise when it comes to safety with the CGSA series, all fitted with tail lights as standard.

Hydraulic Gate Control

The control gates are opened via the tractor hydraulics and capable of opening and closing both sides of the machine separately on the go.

Flip Over Tarp

A practical flip over tarp, opening to two thirds of the spreaders length, prevents mud, rain and other object from entering the spreader during operation.

Stainless Steel Model Features.

Full stainless steel hopper panels.

Full stainless steel spinners.

LED tail lighting.

Stainless steel flow control gates.
